

Animate Earth: Science, Intuition and Gaia

with **Stephan Harding PhD**

29 May - 4 June, 2010 The Park, Findhorn & Newbold

Stephan invites us on a journey to explore how Gaian science and a systems view of Life can help us to develop a sense of interconnectedness with the more-than-human world.

Blending Jungian psychology, deep ecology and the science of Gaia with infectious enthusiasm and passion, Stephan creates a poetic celebration of our co-creative membership in the community of life. During this week-long course we will alternate between informative talks, group dialogue, experiential exercises and time spent exploring the beautiful surroundings of Findhorn.

Stephan Harding PhD Ecology (University of Oxford) has been programme co-ordinator of the MSc in Holistic Science and resident teacher at Schumacher College since 1992. He is a close associate of James Lovelock and an expert in deep ecology and Gaian science. His book *Animate Earth – Science, Intuition and Gaia* has been highly acclaimed.

For depth of understanding of Earth functioning and our human role in the process, Stephan Harding's Animate Earth is the finest of recent studies. Thomas Berry, author of *The Great Work*
This is a wonderful and beautiful book, a teacher's treasure. James Lovelock
Animate Earth represents systems science at its best...gives a whole new dimension to what 'environment-friendly' really means. Jonathon Porritt

Price: £595/£695/£795 (low/medium/high income)
Includes full board and tuition
